## **About Me**

Fluent in speaking multiple languages: English, Cantonese and Chinese with a multicultural background growing up in Malaysia, Vietnam and currently based in Australia. These experiences helped me grow my people skills and to build rapport with people across many backgrounds. Timely, organized and reliable individual, able to collaborate with team members and students. Values fitness and physical health, big gym goer and run consistently to keep fit and active.

I love digital sculpting and 3d modelling, it requires dedication and discipline to see any artforms through, but the final render/sculpt is always worth the effort. Travelling and gaming are also fun past-times I enjoy. Finance, economics and investment are also fields in which I am extremely passionate and interested (even though it's not my major, having knowledge in those fields is always beneficial!).
